

BOIKETLO MOCHOKHOKO

WEB & MOBILE APP DEVELOPER

Passionate full-stack mobile app and web developer with expertise in React JS, React Native, Node JS, MongoDB, and Firebase. I love building creative digital solutions - from back-end to front-end application. Currently learning the C programming language and Svelte framework and always learning to grow.

EXPERIENCE

Software Developer — Atlegile Marketing Solutions (Pty) Ltd

Apr 2024 – Dec 2025

- Developed and maintained software applications using clean, scalable, and efficient code while collaborating with team members on new feature design and implementation.
- Conducted code reviews, wrote unit and automated tests, debugged issues, and ensured high software reliability and quality.
- Participated in full Agile project lifecycle activities including sprint planning, daily stand-ups, retrospectives, and delivered tasks according to project timelines.
- Worked closely with developers, designers, and stakeholders to communicate progress, document processes, and provide technical support.
- Contributed to research and development by exploring new technologies and recommending improvements to development processes and tools.
- Maintained existing applications, ensured performance, scalability, and security compliance, while adhering to company policies and best coding practices.

Training Academy - Mlab CodeTribe

2023

Developed and maintained web and mobile applications, contributed to marketing technology solutions and supported digital product delivery for clients.
